Turn that
music
down!

Out of Hours Noise Service

Helpful hints for a peaceful party

 If you are planning a party warn your neighbours well in advance. Better still invite them along.

 If you are planning music outdoors, think about the volume of your stereo equipment. Can it be heard beyond the boundary of your premises. If so, turn it down (especially the bass).

 If the party continues after 11pm take it indoors and turn down the music as your neighbours may be trying to get some sleep.

 Ask your guests to leave quietly when the party finishes.

 If you are having a firework display please remember that it is now illegal to let off fireworks after 11pm (except on November 5th, Dawali, New Years Eve and the Chinese New Year)
