

Construction or other outdoor work

This prevention card has been developed by the Public Health team at Stockton-on-Tees Borough Council to help people who work in or run construction sites or other outdoor settings during COVID-19.

It is designed to supplement Government Guidance and provide local contact details for businesses in Stockton-on-Tees.

Gov.uk Guidance (Click below)

- [Working safely during coronavirus](#)
- [Construction and other outdoor work](#)
- [Cleaning in a non-healthcare setting](#)
- [General guidance for employees during coronavirus \(COVID-19\)](#)
- [NHS test and trace: workplace guidance](#)
- [Guidance for contacts of people with confirmed coronavirus \(COVID-19\) infection who do not live with the person](#)

General guidelines to prevent spread of COVID-19

There are important actions that everyone should always take to help prevent the spread of COVID-19. It is important that you follow the guidance to minimise the risk to you, your staff, your community and your business.

There are a range of guides to support the safe reopening of your setting. Refer to [Working safely during coronavirus guidance](#) or search the title on GOV.UK. You must carry out a COVID-19 risk assessment for your organisation.

The key messages on this card are specifically in relation to preventing an outbreak and should not replace health and safety and infection steps you already take or have implemented as a result of following the working safely guidance.

Key messages

Follow the gov.uk guidance – to reduce transmission, to protect your business and customers, and to help avoid a local lockdown.

Communicate these key messages to staff, customers and visitors:

Hands: Wash your hands with soap and water regularly for at least 20 seconds. When you can't wash your hands, use alcohol gel in line with government guidance. This will help to reduce the risk of catching or passing on the virus.

Face: Coronavirus is carried in the air by tiny respiratory droplets that carry the virus. Larger droplets can land on other people or on surfaces they touch. Smaller droplets called aerosols, can stay in the air indoors for at least 5 minutes, and often much longer if there is no fresh air. Face coverings reduce the dispersion of these droplets, meaning if you're carrying the virus, you're less likely to spread it when you exhale.

Space: Transmission of the virus is most likely to happen within 2 metres, with risk increasing exponentially at shorter distances. Always aim for 2 metres, however where this is not possible 1 metre plus additional precautions. For example; ventilation (windows open, do not recirculate air), physical screen, avoid talking face-to-face, avoid talking loudly or singing, stand side to side, wear a face covering.

Ventilate: Airing rooms is important as it reduces the number of infectious aerosols in the air. Simple actions like opening windows regularly throughout the day and making sure that mechanical ventilation systems and extractor fans are used correctly, will reduce the risk.

Good respiratory hygiene: Catch it, Bin it, Kill it.

Recognising symptoms (any one of the below)

- a high temperature – this means you feel hot to touch on your chest or back (you do not need to measure your temperature).
- a new, continuous cough – this means coughing a lot for more than an hour, or 3 or more coughing episodes in 24 hours (if you usually have a cough, it may be worse than usual).
- a loss or change to your sense of smell or taste – this means you've noticed you cannot smell or taste anything, or things smell or taste different to normal.

If staff/customers/visitors have any of these **symptoms: stay at home, isolate and test.**

If staff/customers/visitors **live with someone with symptoms of COVID-19: stay at home, isolate and follow government guidance,** which can be found [here](#).

If staff/customers/visitors **are contacts of someone with symptoms of COVID-19: stay at home, isolate and follow government guidance,** which can be found [here](#).

Testing is most effective within 3 days of developing symptoms.

Adapt: adapt working procedures to minimise the contact between individuals. This may include the formation of smaller teams who 'bubble' with one another for the foreseeable future. Ensure staff members are socially distancing, where possible; provide access to hand sanitisers and/or hand washing facilities; consider implementing staggered shifts and break times; implement a one way system around the site, if appropriate; clearly display signage and markings to assist with social distancing and to encourage COVID-19 secure measures; support contact tracing by maintaining a record of visitors, staff and customers; considering wearing face covering, ensure all shared equipment and frequent touch points are cleaned regularly. Reduce crowding by considering how many people can be in each space while being socially distanced.

Communicate your Covid-secure measures at every opportunity – at staff meetings, online, during booking, and prior to entry.

Reporting Cases

If you are notified of a positive case related to your place of work, please contact Stockton-on-Tees Borough Council by completing this <https://www.digital.stockton.gov.uk/covid19-contactus> and we will provide further advice and guidance.

Resources

Public Health England have produced a range of resources to help you communicate these important messages. You will still need specific communications for your own business, but you may find these helpful. You are responsible for communicating these messages with your staff and customers.
